

MANVINDER ARORA

CUSTOMER SUPPORT & SUCCESS

India (UTC+5:30) | [Email](#) | [X](#) | [LinkedIn](#) | [Portfolio](#)

Crypto-native customer support and success operator with five years helping users understand products, solve problems and stay active. I connect support, community and product: answer clearly, spot repeated friction, escalate the right issue and make the next user's journey easier.

150K+ audience scaled	50K+ Discord managed	2,000+ users activated	\$100M+ campaign volume	~\$290K LP capital onboarded
---------------------------------	--------------------------------	----------------------------------	-----------------------------------	--

WHAT I CAN OWN

Onboarding | Troubleshooting | Escalation | Product education | FAQs and knowledge bases | Voice of customer

EXPERIENCE

FusionX Finance | Marketing & BD Head Jul 2024 - Mar 2026

- Worked with traders, communities and product teams across several EVM and SVM products during launches and campaigns.
- Built direct feedback loops with active users and turned product friction into clearer onboarding, communication and escalation context.
- Supported campaigns tied to more than \$100M in 30-day volume while keeping user and trader concerns visible to the operating team.

Timeswap | Marketing & Community Head Jul 2021 - Jun 2024

- Managed and moderated a 50K+ Discord while supporting users across Discord, Telegram and X.
- Explained complex lending mechanics through direct support, AMAs, educational content, FAQs and launch messages.
- Used repeated questions and community sentiment to improve support answers, product communication and the feedback sent to product teams.
- Helped activate 2,000+ users in one month and supported repeat LP relationships representing about \$290K in starting capital.

Independent | Trader, Writer & AI Builder 2021 - Present

- Use wallets, DeFi protocols and perp venues as a real user, giving me first-hand context on onboarding, execution and support friction.
- Build searchable knowledge and publishing tools that make retrieval, explanation and follow-up faster.

SELECTED WORK
