

MANVINDER ARORA

CRYPTO-NATIVE OPERATOR & AI BUILDER

India (UTC+5:30) | Email | X | LinkedIn | Substack | Portfolio

Crypto-native operator with five years across community, content, growth, marketing and business development. I helped Timeswap grow TVL by about 50%, brought in repeat liquidity providers with roughly \$290K in starting capital, helped scale large communities, and later supported FusionX launches tied to \$100M+ in 30-day volume. Outside work, I trade onchain, write about markets and build small AI tools that make my own workflows easier.

~50%	~\$290K	\$100M+	150K+	50K + 50K	2,000+
TVL growth	LP capital	30-day volume	brand followers	Discord + X	campaign users

EXPERIENCE

FusionX Finance | Marketing & BD Head Jul 2024 - Mar 2026

- Ran marketing and BD across EVM and SVM products, working with founders, chain teams, creators and communities on launches and partner campaigns.
- Helped grow SummitX to 150K+ followers and supported CobaltX campaigns tied to more than \$100M in trading volume over 30 days.
- Built direct feedback loops with traders, whales and LPs; turned user friction into clearer content, onboarding and product feedback.

Timeswap | Marketing & Community Head Jul 2021 - Jun 2024

- Joined through community and product education, then took on content, growth, campaigns and LP relationships as the protocol grew.
- Helped support roughly 50% TVL growth and personally onboarded repeat LPs with about \$290K in initial capital (\$200K, \$60K and \$30K).
- Grew and moderated a 50K+ Discord, helped scale X to roughly 50K followers, and ran campaigns that added 2,000+ active users (about 15%) in one month.
- Worked directly with creators and community leaders; wrote threads, FAQs and launch messages that made oracle-less lending easier to understand.

Independent | Onchain Trader, Writer & AI Builder 2021 - Present

- Use Hyperliquid, Lighter, Variational, Nado and Aster as a real trader; received a top-100 Lighter airdrop allocation through sustained product usage.
- Trade crypto, onchain equities, indices and commodities; compare venues through execution, liquidity, fees, funding, incentives and the full user journey.
- Write about perp DEXs, stablecoins, tokenized markets and community work, and build personal tools when an existing workflow feels clumsy.

LINKED WORK

Built for my own use: [Meme Scout Agent](#) | [Crypto Trading Agent](#) | [X-to-Substack](#)

Selected writing: [Perp DEXs: Crypto's clearest PMF](#) | [TradFi became crypto](#) | [Community manager](#)

WHAT I BRING

Growth, community, content, GTM and partnerships; liquidity-provider, whale and creator relationships; DeFi and perp DEX fluency; product feedback; clear writing; AI-assisted workflow design.
