

MANVINDER ARORA

CRYPTO-NATIVE OPERATOR | GROWTH, MARKETING, COMMUNITY, BD & AI BUILDER

India (UTC+5:30) | mani.arora03@gmail.com | X | LinkedIn | Substack | Portfolio

PROFILE

Crypto-native operator with five years across DeFi community, content, growth, marketing, business development, liquidity and go-to-market. My arc began in community and product education at Timeswap, expanded into marketing and BD leadership at FusionX, and now includes active onchain trading, independent research, long-form writing and AI-assisted personal tools. I combine operator execution with a real user lens: I understand how products are explained, distributed, funded, used and improved.

COMMUNITY & EDUCATION -> CONTENT & MARKETING -> GROWTH & BD -> LIQUIDITY & GTM -> MARKETS, RESEARCH & AI SYSTEMS

SELECTED IMPACT

~50% TVL growth supported at Timeswap	~\$290K Initial LP allocations sourced	\$100M+ 30-day CobaltX volume supported
150K+ SummitX followers scaled	50K + 50K Timeswap Discord and X reach	2,000+ Active users added in one month

PROFESSIONAL EXPERIENCE

FusionX Finance | Marketing & BD Head Jul 2024 - Mar 2026

- Led marketing, business development and go-to-market across EVM and SVM products, coordinating founders, chain teams, KOLs, communities and launch partners from outreach through execution.
- Supported CobaltX campaigns that generated more than \$100M in 30-day trading volume; shaped launch narratives, partner communication and ecosystem distribution across SOON, svmBASE and svmBNB.
- Helped scale SummitX to 150,000+ followers through positioning, content testing, product-led storytelling, memes and ecosystem-native distribution.
- Built direct communication loops with whales, liquidity providers, traders and power users through X, Telegram and private groups; carried onboarding friction and product feedback back to growth and product teams.
- Developed co-marketing narratives and partner positioning while writing launch threads, announcements, FAQs, campaign instructions and community updates.

Timeswap | Marketing & Community Head Jul 2021 - Jun 2024

- Helped build the brand, community and user education for an early oracle-less lending protocol across X, Discord and Telegram, translating technical mechanics into clear user actions.
- Supported approximately 50% TVL growth through LP onboarding, educational content, organic demand generation and demand-led launches without relying on unsustainable token emissions.
- Personally sourced and onboarded repeat LPs with approximate initial allocations of \$200K, \$60K and \$30K; reactivated users after fixed-term pools expired when new pools offered compelling opportunities.
- Grew and moderated a 50,000+ member Discord and helped scale X to roughly 50,000 followers while running daily support, product communication and community programming.
- Designed and ran Galxe, QuestN and Phi campaigns that added 2,000+ active users (about 15%) in one month; managed eligibility questions, feedback and post-campaign retention.
- Worked directly with KOLs and community leaders, ensuring they understood the product before promotion and turning recurring user questions into explainers, FAQs and product feedback.

Independent | Onchain Trader, Researcher, Writer & AI Builder 2021 - Present

- Active user of Hyperliquid, Lighter, Variational, Nado, Aster and emerging venues; received a top-100 allocation in the Lighter airdrop through sustained product usage.
- Trade crypto, onchain equities, indices, commodities and other RWA markets; evaluate venues across onboarding, collateral, execution, liquidity, market coverage, fees, funding, points, withdrawals and support.
- Track market narratives, catalysts, leverage, liquidity and trader attention across X, Telegram, protocol documentation and public/onchain data, then form independent market views.
- Write long-form articles and product commentary about perp DEXs, stablecoins, tokenized markets, community operations, incentives and trader behaviour in simple, crypto-native language.

SELECTED PERSONAL SYSTEMS

Crypto Trading Agent: Probability-first research and execution dashboard for setup ranking, triggers, trade review, risk context and learning from missed moves.

X-to-Substack Pipeline: Personal writing workflow that turns long-form X articles into reviewable Substack drafts and reconciles published posts.

Market Bubble Live Desk: Personal production view that combines Twitch, Kick and X signals into questions, clips and show decisions.

Substack AI Digest: Daily reader that ranks selected AI/Codex posts, removes duplicates and remembers what has already been surfaced.

SELECTED WRITING

- Crypto didn't become TradFi. TradFi became crypto - market reflexivity, leverage, narratives and forced selling across global markets. [Read](#)
- The casino should always be open - tokenized assets, stock perpetuals and the move toward always-on markets. [Read](#)
- The Community Manager Is Dead. Long Live the Community Manager - a practical view of community work as product feedback, distribution and trust. [More on Substack](#)

CORE CAPABILITIES

Growth & GTM: Organic acquisition, product-led campaigns, activation, retention, reactivation, A/B content testing, launch strategy and ecosystem expansion.

Business Development: Founder and partner outreach, LP/whale onboarding, KOL relationships, ecosystem co-marketing, value propositions, follow-up and liquidity activation.

Community & Content: X, Discord, Telegram, AMAs, moderation, crisis communication, threads, explainers, FAQs, memes, campaign copy and technical-to-simple writing.

Markets & Product: DeFi lending, perp DEXs, stablecoins, RWAs, liquidity, fees, funding, incentives, trader psychology, user journeys and product feedback.

AI & Building: ChatGPT, Codex, AI-assisted research, writing and rapid prototyping; Python, Node.js, dashboards, browser automation, RSS and lightweight data workflows.

WORKING STYLE

Crypto-native, first-principles and hands-on. Strongest when a role needs someone who can understand the product, speak to users and partners, write clearly, operate inside fast-moving markets, and build a practical tool when the existing workflow is not enough.
